PREFACE

FROM some points of view it is a misfortune that in American schools the study of Latin is usually undertaken so late that every detail of the work of the first terms must be planned with a view to reaching Caesar in a year. Encouraging signs, however, are appearing here and there, and in two or three states a movement is already on foot to carry the beginning of Latin back into the upper grades of the grammar school.

For the prosecution of this work in the grades there seems to be an almost total lack of satisfactory manuals, and it thus happened that some time ago, wishing to take up the study of Latin with one of my own children, I was led to work out for myself a plan of instruction suited to the years of my pupil. Out of that experience the present volume has grown.

In the formulation and development of the plan of the book, I have aimed particularly at four things:

    (1) To lay a broad and sure foundation of forms.

    (2) To impress through constant use a limited number of the most fundamental constructions.

    (3) To make thoroughly familiar, by continued repetition, a working vocabulary of something less than four hundred words.

    (4) To infuse a large degree of human interest into the work.

In pursuance of the last mentioned of these aims, I have admitted into the earlier Exercises several Latin words

selected rather for the interest they might excite than because of frequency of use in Caesar's *Commentaries* or Cicero's *Orations*, and, in the treatment of forms and syntax, the order of topics has been determined very largely with a view to the early development of interesting dialogue and narrative. In general method, however, the book follows thoroughly well-tried and conservative lines; and I hardly need add that, in making the above-named innovations, it is far from my purpose to render the work easy or attractive at the expense of real and substantial attainment on the part of the pupil.

The lack of general vocabularies at the end of the volume is by no means due to oversight; for it is an integral part of my plan that the student should fully master and make his own the vocabulary of each Exercise as it comes. Indeed, the number of new words in a day's lesson is so small and the amount of repetition so great that general vocabularies at the end of the book would be nothing but a hindrance to the proper use of the manual. In place of these, therefore, I substitute simply a Latin Word List. By means of this list, in case of dire need, a pupil could run down the meaning of a word; but as a matter of practice such need will seldom be found to arise.

The habit of thorough acquisition of each day's vocabulary results quickly and naturally in ability to read at sight. To foster on the part of the pupil the development of this very desirable power, there has been introduced into each Exercise, beginning with Number XXXV, one of a series of little stories told in Latin. The series is developed strictly on the gradatim plan, each successive anecdote being constructed so completely of familiar materials that footnotes are nowhere necessary. Such a programme of course subjected the writer to a very trying restraint; but

it was in this way possible to develop a body of material which provides practically ideal conditions for the practice of sight reading.

This Primer is shortly to be followed by a First Latin Reader, the two books together covering the field commonly referred to as "First Year Latin." The stories of the Reader are drawn in large part from early American history, a subject that lends itself very happily to the purpose in hand; for the tales of those stirring days of war and adventure are replete with human interest, while at the same time they afford the most admirable opportunity for the introduction of the vocabulary and syntax of Latin historical narrative. The Reader continues with somewhat greater freedom the gradatim plan begun in the Primer, and the pupil who first went over the ground covered by the two books was able to complete even the simplified Caesar contained in the Reader without knowing what it is to "prepare" an English translation; for from the very start translation "at sight" had established itself as the norm in the most delightful and natural manner possible. On account of the narrow limitations of syntax and vocabulary, the anecdotes of the Primer are largely fanciful; but in the Reader it is my aim to make the narrative historical.

In putting the material of this volume into final form, I have been much helped by the suggestions of Dr. R. Arrowsmith. I would also here express my thanks for similar assistance received from Miss Margaret Webb and Miss Clara L. Smith, both of whom have used my manuscript as a basis for the work of the newly organized seventh grade Latin classes in the Berkeley schools.

TO THE TEACHER

In work of the grade for which this Primer is designed much must be left to the discretion of the instructor. I venture, however, to add a word of suggestion or advice on several topics:

1. **Oral Work.** In connection with the earlier Exercises particularly, it is eminently desirable that much time be spent in oral work. The printed sentences of the Exercises are practically forced into the form which they have taken by the fact that, in addition to illustrating as fully as possible the new points of the lesson of the day, they must also include adequate review material. Supplementary work, oral or otherwise, would naturally follow freer lines. One teacher succeeded in stirring the interest of an immature class by putting together, almost from the very start, short connected sentences, e.g. *Agricola in āreā est. Corbulam tenet. In corbulā ūvās et rosās habet;* and my own experience has shown that, as soon as the limitations of vocabulary and syntax will permit, it is both profitable and popular to construct out of familiar materials short stories to be translated at hearing. As a help to those who may wish to do somewhat extensive work along *viva voce* lines, a short list of colloquial phrases has been added in Appendix II. All such work, of course, must be strictly supplementary. Nothing can with safety be substituted for the comprehensive test of the printed sentences.

2. **Pronunciation.** In the belief that pronunciation is best learned by youthful beginners directly from the teacher, general treatment of this subject has been rele-

gated to Appendix I. Teachers will use their own discretion as to the use of the material there provided.

3. **Paradigms.** It has seemed best to prefix to the paradigms all of the customary headings, although it is not expected or desired that equal attention be given at the outset to all such introductory phrases; for example, of the various headings of the paradigm of Exercise II, the phrase "Present Tense" is clearly of greatest importance for the work of that particular lesson. As different paradigms are taken up, the teacher should emphasize the heading or headings to which he feels that his class can with profit give attention.

In constructing the paradigms I have purposely refrained from attempting to define the different cases, moods, etc., of the words used as models. As regards the verb, it is really impossible to frame brief and adequate definitions for the forms as they stand in the paradigm; and with respect to the noun, too, the question of definition is not without complications. For example, in this manual the ablative is first put to actual use in connection with the prepositions *in* and *sub* to express "place where," and it would therefore seem wholly illogical to inform the student in the paradigm of Exercise I that the ablative case signifies "with," "by," etc. Personally, I find that it works well to postpone definition until forms are put to actual use; but any teacher who prefers the other plan can of course supply at once for the use of the class those definitions which seem to him best to cover the ground.

4. **The Verb.** The great wealth of Latin verb forms makes it ultimately impossible to maintain an adequate review through the medium of the sentences of the Exercises merely. As a supplementary measure it has been

found helpful to write out the forms on small cards, one on each card. These drawn out at random furnish an excellent memory test, the pupil's interest being held meanwhile by the likeness to a game.

5. **Assignment of Work.** The rate of progress through the book must of course be determined by the aptitude of the class. In many cases it will be found necessary to spend at least two periods upon single Exercises, and that too with frequently interspersed reviews.

In conclusion, to those who now for the first time are about to join in the pleasant work of introducing young beginners to the study of Latin, let me say by way of reminder that it is very easy for an adult to underestimate the difficulties under which a seventh or eighth grade pupil is laboring. If such a student at the outset is a little bewildered by his new environment and makes a number of very crude mistakes, this fact should not be counted either surprising or discouraging. Three things only are necessary: Have patience; Keep good models before the pupil's eye and ear; Repeat often.

TABLE OF CONTENTS

INTRODUCTORY NOTES AND DEFINITIONS

INFLECTION

LATIN nouns, pronouns, adjectives, and verbs are inflected, *i.e.* undergo changes of form which show their relation to other words in a sentence. The inflection of nouns, pronouns, and adjectives is called Declension, and the inflection of verbs is known as Conjugation.

DECLENSION

In speaking of the different forms which nouns, pronouns, and adjectives may take, the terms Case, Gender, and Number are used.

Case. The three cases of English can be seen to best advantage in the pronoun; for example, "he" (Nominative Case), "his" (Possessive Case), and "him" (Objective Case). Latin has several additional cases, which correspond in meaning to the English objective case with a preposition; thus, "to a sailor," "for a sailor," "with a sword," etc., could all be translated into Latin without the help of prepositions.

Gender. In English we have the very simple gender rule that the names of males are Masculine, the names of females are Feminine, and the names of things are Neuter. In Latin, too, these three genders are found, but the rule is more complicated; for in Latin the names of *things* may be either masculine, feminine, or neuter.

Number. In the English phrases "the *ship*" and "the *ships*," the difference between the nouns is one of number; that is, "ship" refers to *a single* vessel, and "ships" to *more than one* vessel. To mark this difference we use the terms Singular Number ("ship") and Plural Number ("ships"). These terms are used in just the same way of Latin words.

CONJUGATION

In connection with the inflection of the verb, the following terms are used : Mood, Number (already defined), Person, Tense, and Voice.

Mood. The moods of a verb are its ways of expressing action. Both English and Latin verbs have three moods; namely, Indicative, Subjunctive, and Imperative. A verb in the Indicative Mood generally *states* that a thing *is so ;* for example, "The boys *are running*." In the Imperative Mood a verb *commands* something *to be done*, as " *Run*, boys." The uses of the Subjunctive Mood are various.

Person. In English and Latin there are three persons. The First Person refers to the speaker ("I," "we"), the Second Person refers to the person spoken to ("you"), and the Third Person refers to the person or thing spoken of ("he," "she," "it," "they").

Tense. An English or Latin verb by its tense indicates the *time* of an action; as, "I *see*" (Present Tense), "I *shall see*" (Future Tense), etc.

Voice. In the sentence "John ran," the verb tells what John *did ;* but in "John was caught," the verb tells what *was done* to John. To mark this difference the terms Active Voice ("ran") and Passive Voice ("was caught") are used of both English and Latin verbs.

EXERCISE I

THE FIRST OR Ā–DECLENSION [1]

mḗnsa, *table*

CASE	SINGULAR NUMBER	PLURAL NUMBER
Nominative	mḗnsa	mḗnsae
Genitive	mḗnsae	mēnsā́rum
Dative	mḗnsae	mḗnsīs
Accusative	mḗnsam	mḗnsās
Ablative	mḗnsā	mḗnsīs

Listen carefully while the teacher pronounces these Latin words. Note especially that the accent nowhere falls upon the last syllable.

Commit to memory the singular and plural of **mēnsa**, connecting each form with the name of its case. The meaning and uses of these cases will be taken up later.

Gender. — All nouns of the First Declension are feminine, excepting the few names of males.

VOCABULARY

córbula, -ae, F., *basket.*	píla, -ae, F., *ball.*
naúta, -ae, M., *sailor.*	rósa, -ae, F., *rose.*

REMARK 1. In the above vocabulary the -ae following each noun is the ending of the genitive singular; and F. and M. are abbreviations for "Feminine" and "Masculine." Each noun should be memorized in the following way: "**Córbula, córbulae,** Feminine, *basket.*"

---

[1] For the meaning of "Declension" and other grammatical terms here used, see Introductory Notes and Definitions, pages 15 and 16.

PILAE

Among the Greeks and Romans ball playing, except for small children, was for the most part a means of exercise rather than a mere game. The balls used were of various sizes, some being as large as a football or " medicine " ball. Bats and racquets were not then in use. The players either threw the ball or struck it about with the hand or arm.
CORBULA

The Romans used baskets of many shapes and sizes. Some were very stout and strong ; for example, those in which soldiers carried away on their shoulders the earth dug out in making fortifications. The particular kind of basket shown in the picture was used on the farm for fruit picking and other purposes.

REMARK 2. In headings and vocabularies it is convenient to render **mēnsa** by "table," **corbula** by "basket," etc. But, when actually used in a sentence, **mēnsa**, for example, would be apt to mean "*the* table," or "*a* table." In Latin there is nothing corresponding to the English articles "a," "an," and "the."

I. Name the case and number of the following forms: **pilae, corbulā, rosīs, nautārum, mēnsās, pilam, corbula.**

II. Give:

The genitive plural of **rosa**; the ablative singular of **pila**; the dative plural of **mēnsa**; the accusative singular of **nauta**; the nominative plural of **corbula**; the accusative plural of **rosa.**

PERSON	SINGULAR NUMBER	PLURAL NUMBER
1st person	hábeō	habḗmus
2d person	hábēs	habḗtis
3d person	hábet	hábent

REMARK. In English we say "*I* have," "*you* have," "*he* (*she, it*) has," "*we* have," etc., depending largely on the pronouns to show the person and number of the verb; but in Latin a verb has special endings which render unnecessary the use of pronouns for this purpose. Note above how the endings of **habeō** change for each person and number.

[1] For the meaning of the grammatical terms here used, see Introductory Notes and Definitions, pages 15 and 16.

With **habeō** as a model, give the corresponding forms of **téneō**, *I hold, I am holding*.

in, preposition, used with the ablative case, *in, on, at*.

REMARK. Note particularly the second meaning of **est**. In Latin there is nothing corresponding to "there" in such phrases as "there is," "there are," etc.

Nautae corbulam habent, The sailors have a basket.

RULE I. *With an active verb, the nominative is the case of the doer, and the accusative is the case of the thing directly affected by the verb action.*

Thus, in the first of the model sentences above, **Nauta** (nominative) is the doer, and **corbulam** (accusative) is the thing directly affected by the verb action; in other words, **Nauta** is the Subject of the verb, and **corbulam** is its Direct Object.

RULE II. *When the Subject of the verb is plural* (as in the second of the model sentences), *the verb likewise must be plural.*

SĪMIA

This little doll is made of ivory, and its arms and legs are movable. Roman girls had also dolls made of rags, wood, wax, or terra cotta. Some dolls were much more elaborate than the one in the picture.

SELLA

SOLEAE

As Italy is a warm country, the Romans often went barefooted when in their own homes. For outdoor wear they preferred sandals of which the "upper" consisted merely of a strap or two. The *soleae* above shown were of the kind used in the army.

The chairs of the Romans for the most part lacked both back and arms. Seats of honor, as in the picture above, were sometimes provided with a foot-rest. High officials commonly occupied a sort of camp-chair, the legs of which were made of ivory.

2. "Where are the sailor and the monkey hiding?" asked Marcus. "I see the sailor in the yard," said Julia, "The monkey is under the chair."

PERFECT TENSE

PERSON	SINGULAR NUMBER	PLURAL NUMBER
1st person	hábuī	habúimus
2d person	habuístī	habuístis
3d person	hábuit	habuḗrunt

Inflect in the same way the perfect tense of **doceō** (**dócuī**), iaceō (**iácuī**), lateō (**látuī**), sedeō (**sḗdī**), teneō (**ténuī**), timeō (**tímuī**), videō (**vídī**); so also of **sum** (**fúī**). Note that in **sēdī** and **vīdī** there is no **u** before the final **ī**. Consequently the perfect of **sedeō**, for example, proceeds: **sḗdī, sēdístī, sḗdit**, etc.

NOTE. The perfect is the past tense of the indicative mood most used in Latin. It has two distinct meanings. For example, **vīdī** means either " I saw " or " I have seen "; **fuī**, " I was " or " I have been "; etc.

REMARK. Special attention must be given verbs like **sēdī**; for, since the present **sedeō** means " I am sitting " as well as " I sit," it is very easy to make the mistake of translating **sēdī** by " I was sitting." The correct renderings of **sēdī** are indicated above, namely, " I sat " and " I have sat " (" I have been sitting "). Give also the proper translations of **docuī**, **iacuī**, **latuī**, and **tenuī**. By an apparent exception to the rule, **timuī** may be correctly rendered by " I was afraid (of)."

CASE	SINGULAR	PLURAL
Nominative	hórtus	hórtī

Dative	hórtō	hórtīs
Accusative	hórtum	hórtōs
Ablative	hórtō	hórtīs

VOCABULARY

équus, -ī, M., *horse.*   **Quíntus**, -ī, M., a boy's name.
Márcus, -ī, M., a boy's name.   **caúda**, -ae, F., *tail.*

RULE. *The genitive is the case of the person or thing to which something belongs; for example,* **Mārcī cymba**, *Marcus' boat;* **puellae equus**, *the girl's horse;* etc.

In this use the genitive corresponds to the Possessive Case in English.

REMARK. In a Latin sentence it is not always possible instantly to recognize a genitive, since sometimes other cases are like it in form. Thus **equī** (so far as form is concerned) might be either genitive singular or nominative plural; and **nautae** might be either genitive or dative singular or nominative plural. When such forms are used, we have to depend on the other words of the Latin sentence to make clear which case is meant.

HORTUS

Rich Romans took much pride in well-kept pleasure gardens. In these there were level walks with fountains here and there, flowers were carefully cultivated, and the trees and shrubs were often cut into ornamental shapes. The picture above shown was found painted on a wall in the ruins of Pompeii. There were, of course, plenty of vegetable gardens also in Italy, but painters seem to have taken little interest in them. The lower picture is from Herculaneum.
HORTUS

B. 1. "Quid videt Quīntī equus?" inquit Mārcus. "Equus herbam et aquam videt," inquit Mārcella. 2. "Cūr agricolae equōs tenent?" inquiunt puellae. "Equōs tenent," inquit Quīntus, "quia in viā nautae cum sīmiīs fuērunt. Equī nautārum sīmiās timuērunt." 3. "Ubi sēdistis?" inquit Mārcus. "In pūpārum sellīs sēdimus," inquiunt puellae.

ē, ex, preposition, used with   **in**, preposition, used with
the ablative case, (*out*)   the accusative case, *into.*

REMARK 1. The verbs from which come the perfects **cucurrī**
and **vēnī** do not belong to the second conjugation ; but the in-
flection of the perfect tense of all conjugations is identical.   With
habuī, therefore, as a model, inflect the perfects **cucurrī** and **vēnī**.

REMARK 2. Both forms of the preposition **ē, ex** have the same
meaning.   The second form is to be used when the following
ablative begins with a vowel or **h**.

REMARK 3. Contrast the meaning of **in** and the ablative with
that of **in** and the accusative.   The former indicates Place Where,
the latter Place into Which.   Translate the following phrases : **in

Nominative	mālum	māla
Genitive	mālī	mālōrum
Dative	mālō	mālīs

REMARK. The accusative of neuter words is always the same as the nominative. Note how this fact is illustrated by the singular and plural of **mālum**.

Gender. The second declension is made up almost wholly of masculine and neuter nouns. Regular masculines end in -us or -er, and the neuters end in -um. The few feminines belonging to this declension have the termination -us.

Roman shops were often hardly more than booths. But many dwelling houses were so built that the ground floor on the street side could be let out to tradesmen. Each such store consisted usually of a single room shut off completely from the rest of the building, the merchant doing his business there during the day, but having his residence elsewhere. At night the shops were closed by putting up wooden shutters in front.

REMARK. The perfect **iī** is a shorter form for **īvī**. Generally the singular and plural of the second person are further shortened to **īstī** and **īstis.**

READING LESSON

I. Translate into English :

A. 1. Itaque agricola puerōs cum equīs in agrōs mīsit. 2. Cūr in tabernam īstis ? Cūr in sellīs sedētis ? 3. Puellās ex hortō in āream mīsistī. 4. Cūr puer pūpās tenuit ?

II. Translate into Latin :

A. 1. The farmer went from the tent, and sent the boys into the sailors' boat. 2. In the farmer's garden are berries and roses ; on the beach there are shells. 3. And so the farmers' horses came from the field and ran into the garden.

B. 1. " Where are the monkeys ? " asked Julia. " The monkeys went with the boys into the tent," replied Marcus ; " but now they are on the street." 2. " Why did you come from the shade into the road ? " said Claudia. " I came into the road because I am afraid of the farmer's horse," answered Marcella. " But," said Quintus, " the farmer has come from the store with the boys and sent the horse into the fields."

ad, preposition, used with the accusative case, *to.*

dūxī, *I brought, I have brought; I led, I have led.*

poenās dedī, *I was punished, I have been punished.*

REMARK 1. Contrast the meaning of in and the accusative with that of ad and the accusative, the former indicating Place *into* Which, the latter Place *to* Which.

REMARK 2. The phrase poenās dedī means literally " I paid the penalty," hence " I was punished." The perfect dedī is to be conjugated as any other perfect, poenās remaining unchanged; *e.g.* poenās dedī, poenās dedistī, poenās dedit, etc.

READING LESSON

I. Translate into English :

In this illustration school seems to be in session in an open colonnade, as was the custom among the Greeks. Three boys may be seen sitting on *sellae*, holding spread out upon their laps rolls of manuscript from which they are studying. Their less fortunate companion in front is being severely whipped.
SUBSELLIUM

Any bench upon legs and without a back was called *subsellium*. The particular bench shown above was found in the public baths of Pompeii. Note the ornamental carvings upon the legs.

II.   Translate into Latin:

A. 1. Marcus' books lie on the bench.   2. And so the teacher then brought the boys and girls from the garden into the street.   3. You were punished at school. 4. What did you have in the basket?

B. 1. "The sailor's monkey hid in the grass and frightened the teacher's horse," said the girls. "Then he was punished."   2. "Let's play ball in the school," said Marcus. "Where is the teacher?" asked Quintus. "The teacher is in the yard," answered Marcus. "He led the horse to water," said Claudia; "then he came into the yard with (his) books, and is now lying on the bench."

EXERCISE XIII

THE VOCATIVE CASE

In addition to the five cases already treated, words of the second declension ending in -**us** have also a special vocative singular, *e.g.* **Mārce**, **Quīnte**, etc.   Everywhere else, in all declensions, the nominative is made to do service as a vocative.

MODEL SENTENCES

Ubi sunt librī, Mārce ?   Where are the books, Marcus?

Quid habēs, Iūlia ?   What have you, Julia?

Cūr ē cymbā, puellae, cucurristis ?   Why did you run from the boat, girls?

RULE.   *The vocative case is used in addressing a person by name or title.*

REMARK.   In an English sentence the vocative often stands first, but in Latin it seldom has this position.   In a short sentence it is apt to stand last.

VOCABULARY

stilus, -ī, M., *pen*.	**capsa, -ae**, F., *school bag*.
tergum, -ī, N., *back*.	**tabula, -ae**, F., *tablet*.
umerus, -ī, M., *shoulder*.	**vēxī**, *I carried, I have carried*.

REMARK. The verb of which **vēxī** is the perfect is seldom applied to men. It is commonly used of carrying by horses, ships, etc.

READING LESSON

I. Translate into English:

A. 1. Quid in capsā habēs, Quīnte? 2. In capsā librōs et tabulās habeō. 3. Ubi est sīmia, Claudia? 4. Sīmia in nautae umerō sedet; mālum habet. 5. Quid in harēnā vīdistis, puellae? 6. Corbulās et conchās vīdimus.

"Equus magistrum ad lūdum vēxit," inquit Claudia. "Tum vēnit agricola, et equum in agrōs dūxit." 3. "Cūr cum tabulā et stilō, Quīnte, sub mēnsā sēdistī?" inquit Mārcus. "Mārcellam et Claudiam terruī," inquit Quīntus; "itaque poenās dedī."

B. 1. "The school bag is in the tent," said Julia. "It lies with the books in the doll's cradle." 2. "What do you see, Claudia?" asked Marcella. "I see the boys in

STILUS ET TABULAE

CAPSA

Tablets were commonly made by putting a layer of wax upon strips of wood. Upon such tablets school children traced letters with a *stilus*, which was a piece of metal shaped somewhat like a pencil. The writing end of the *stilus* was very sharp, while the other was often flattened so that it could be used to erase marks made in the wax.
The *capsa* was, strictly, a box rather than a bag. It was circular in form, and had a cover. Rolls of manuscript (*librī*) standing on end fitted very nicely into such a box. Sometimes a slave was sent along to carry a boy's *capsa* to school for him. The above illustration is somewhat stiff and formal in its style.

REMARK. Note that the masculine of this adjective is declined like hortus, the feminine like mēnsa, and the neuter like mālum. The forms should now be memorized from left to right, thus: (Nom.) bonus, bona, bonum; (Gen.) bonī, bonae, bonī, etc.

VOCABULARY

RULE. *An adjective has the same gender, case, and number as the noun to which it belongs; e.g.,* puellae parvae, puellās bonās, *etc.*

REMARK. It should be remembered that a few nouns of the first declension are masculine. With these, of course, the masculine forms of the adjective must be used; *e.g.,* nautae magnī, nautās bonōs, etc.

MODEL SENTENCES

Mārcus est parvus, Marcus is small.
Quīntus est agricola, Quintus is a farmer.

ancilla, -ae, F., *maidservant, maid.*

spēlunca, -ae, F., *cave, den.*

ursa, -ae, F., *bear.*

compleō, *I fill, I am filling;* perfect tense, complēvī.

ōlim, adverb, *once (upon a time).*

ut, conjunction, *(so as) to, (so) that.*

MODEL SENTENCES

Iūlia latet, ut Mārcum terreat, Julia is hiding to frighten Marcus.

Iūlia latuit, ut Mārcum terrēret, Julia hid to frighten Marcus.

RULE. *The purpose for which a thing is done may be expressed by* ut *and the subjunctive.*

Note. In this construction the tense of the subjunctive is determined by the tense of the main verb of the sentence. If the main verb is a present or future, the present subjunctive is used in the purpose clause; if the main verb is a past, the imperfect subjunctive is used. These points are illustrated in the model sentences above.

Remark 1. In writing Latin purpose clauses, careful attention must be given to the person and number of the verb. In English we may say " I came *to see*," " you came *to see*," " he came *to see*," " they came *to see*," etc., making no change whatever in the form of the purpose clause; but if these four sentences should be translated into Latin, each purpose clause of course would be different, namely, **vēnī ut vidērem, vēnistī ut vidērēs, vēnit ut vidēret, vēnērunt ut vidērent**. In case of doubt, the proper Latin form can always be found by expanding the English purpose clause: for example, " I came to see " = " I came that *I might* see "; " you came to see " = " you came that *you might* see "; etc.

Remark 2. The subject of the main verb of the sentence and the subject of the verb of the purpose clause of course need not be identical; *e.g.* **Agricola ex agrō vēnit, ut Claudia equum vidēret,** *the* farmer *came from the field, so that* Claudia *might see the horse.*

REMARK. When used with the ablative forms of these pronouns, the preposition **cum** follows, and is written as a part of the word; *i.e.*, mēcum, tēcum, nōbíscum, vōbíscum. Note how the addition of -cum affects the accent of nōbīs and vōbīs.

  The illustration shows the bronze frame of a bed found at
Pompeii.   Often a *lectus* was provided with a footboard and
back, and thus looked very much like an old-fashioned sofa with
a pillow at one end.

" bācās multās nōbīs dedistis; corbulās complēvimus. Crās
māla habēbitis?"   3. "Cūr in ursae spēluncam cucur-
ristī, Mārce?" inquit nauta. "In spēluncam cucurrī,"
inquit Mārcus, "ut Claudiam monērem."   4. "Ōlim ē

not give you a strong boat, boys?   4. The doll is sitting
on the bench, so that the monkey may lie on the bed.
For Marcella is holding the white dove in (her) lap.

B. 1. "Why did the teacher give me the apples,
Claudia?" asked Quintus. "He gave you the apples,"
replied Claudia, "so that we should sit with you in the
shade; for he has sent Julia and Marcus into the fields.
Where *are* the apples?"   2. "What did you give the
farmer's lazy son yesterday?" said Claudia to Quintus.
"We gave the boy money," replied Quintus. "And so
he went with us into the yard to fill the baskets; for there
are many berries in the shade."   3. "I will sit with you,
girls," said Marcus; "but I do not see the books and
tablets."

EXERCISE XXI

MODEL SENTENCE

Mārcus in hortum iit, ego in tabernāculum cucurrī,
Marcus went into the garden, *I* ran into the tent.

RULE. *As subject of a verb, the personal pronouns* **ego**
(nōs) *and* **tū (vōs)** *are in general written only for emphasis
or clearness or to mark a contrast.*

VOCABULARY

POSSESSIVE ADJECTIVES

meus, -a, -um, *my, mine,*   **noster, -tra, -trum,** *our, ours.*
tuus, -a, -um, *your, yours* (in   **vester, -tra, -trum,** *your,*
   speaking to one person).   *yours* (in speaking to more
                                    than one person).

REMARK. The vocative of the masculine singular of **meus** is
mī, a form already familiar in the phrase **mī fīlī**.

NOTE. The genitive of the personal pronouns **ego** and **tū** is not
used to tell to whom something belongs, such use of the genitive
being rendered unnecessary by the above Possessive Adjectives;
e.g., **liber meus, stilus tuus,** etc. (To use the genitive of **ego** and
tū in such phrases would be as bad as to say in English "the
book of me" instead of "my book," etc.)

And so the farmer's sons threw the apples into the large baskets.

B. 1. "You will soon see the girls, Claudia," said Quintus; "in the meantime they will be in the boat with me." 2. "Once," said Marcus, "Julia had brought your little fox to school, Quintus. But the sailor's lazy son threw books and tablets at the girl and little fox." 4. "Meanwhile the bears had killed a farmer's horse," remarked the girl. "I saw the poor horse," said the sturdy sailor. "To-day I shall sit in the woods to frighten the bears; for I have arrows." 5. "Where were you, boys?" asked Marcella. "Had you gone to the cage to see the white doves?"

EXERCISE XXVII

MODEL SENTENCE

Mārcus sagittā columbam occīdit, Marcus killed the dove with an arrow.

RULE. *The ablative without a preposition is used to tell the means by which anything is done. This use is known as the Ablative of Means.*

REMARK. Quite frequently, as in the above example, the Ablative of Means is conveniently rendered by "with." This "with" must not be confused with the "with" meaning "in company with," which, as previously shown, is represented in Latin by **cum** (and the ablative case). This latter construction is called the Ablative of Accompaniment.

For your grandmother has sent the farmer's big daughter, so that you would be good boys.

B. 1. "Soon many boys came with stones," said Julia, "and broke the dolls' pretty table." "Why did you not send me into the yard to frighten the bad children?" asked Quintus. 2. "Where did you find your sandals, girls?" said Claudia. "When we came into the yard and were sitting in the tent," replied Julia, "we saw Marcella's sandals in the grass; Marcus had thrown mine into the water." 3. "Quintus will hold the dove," said Marcus; "meanwhile we will warn the farmer, and scare the little foxes." 4. "The monkey's hiding place is under the stairs," said Marcus. Acc.	eum	eam	id	eōs	eās	ea
Abl.	eō	eā	eō	eīs, iīs, īs	eīs, iīs, īs	eīs, iīs, īs

REMARK. It must be remembered that the names of *things* in Latin may be either masculine, feminine, or neuter. Hence English "it" is variously represented in Latin. For example, in referring to a book (**liber**), "it" must be rendered by **is**; but in speaking of a table (**mēnsa**), **ea** should be used; and **id** would be the proper form when speaking of an apple (**mālum**).

NOTE. Like the other personal pronouns (**ego** and **tū**), the pronoun of the third person is in general written as subject of a verb only for clearness or emphasis, or to mark a contrast; *e.g.*, **Ego et Mārcus pigrī sumus ; ego in tabernāculō iaceō, is in herbā sedet,** *Marcus and I are lazy ; I am lying in the tent, he is sitting in the grass.*

In the center is a round stone table (*mēnsa*), on three sides of which are sloping couches of masonry. On occasion these couches were covered with cushions, and here guests would recline to partake of a feast (*cēna*), each man helping himself to the good things which the slaves placed on the table in the center. INDICATIVE MOOD   ACTIVE VOICE

IMPERFECT TENSE

	SINGULAR	PLURAL
1st person	habēbam	habēbāmus
2d person	habēbās	habēbātis
3d person	habēbat	habēbant

Conjugate in the same way the imperfect indicative
active of compleō, doceō, iaceō, lateō, moneō, etc.

NOTE. The imperfect tense is used to describe something as
going on at a definite point or period in past time ; *e.g.*, Mārcus in
āream vēnit ; ego tum in tabernāculō sedēbam, *Marcus came into
the yard ; I then* WAS SITTING *in the tent.*

REMARK. In the above example, note carefully how the use of
vēnit differs from that of sedēbam. Thus the perfect vēnit simply
states that something *happened,* whereas the imperfect sedēbam
tells what *was happening* at that very same time (compare the use
of the imperfect subjunctive in clauses introduced by cum, Exer-
cise XXII). This peculiar force of the imperfect tense cannot be
too firmly fixed in the mind.

Compare the meanings of the following tenses:

Present	**sedeō**	*I sit, I am sitting.*
Imperfect	**sedēbam**	*I was sitting.*
Perfect	**sēdī**	*I sat, (I have sat) I have been sitting.*

In the same way, give the meaning of each of these tenses of **compleō, doceō, iaceō, lateō, moneō, teneō, terreō, timeō, videō.**

REMARK. For the imperfect of **habeō**, the exact translation "I was having" is often hardly good English. But though we are generally thus forced to render **habēbam** by "I had," we may still *feel* the difference of meaning between it and the perfect **habuī.**

2d person	habueris	habueritis	habuerīs	habuerītis
3d person	habuerit	habuerint	habuerit	habuerint

REMARK 1. As an aid to the memory, note that the last syllables of the future perfect indicative forms spell out the future of the verb sum, excepting in the third person plural; and that the perfect subjunctive is the same as the future perfect indicative, with the exception of the first person singular and the fact that the i is long in three forms.

REMARK 2. The future perfect indicative and the perfect subjunctive of verbs of all conjugations are inflected in the same way as habuerō and habuerim. To find the first person singular for any verb, change the -ī of the perfect indicative to -erō and -erim; e.g., cucurrī, cucurrerō, cucurrerim; iī, ierō, ierim; vēnī, vēnerō, vēnerim; fuī, fuerō, fuerim; etc.

REMARK 3. The future perfect tense refers to a future event completed before another future event; e.g., Mārcus mox in cymbā erit; ego interim ex agrīs vēnerō, *Marcus will soon be in the boat; meanwhile I shall have come from the fields.* The perfect subjunctive is used mostly in dependent clauses, in ways to be explained elsewhere.

EXERCISE XXXIV

SYNOPSIS OF THE VERB

In summarizing the forms of a verb it is necessary to recognize a standard order of tenses. Thus, the synopsis of **habeō** and **sum** would be arranged as follows:

ACTIVE VOICE

	INDICATIVE MOOD		SUBJUNCTIVE MOOD	
Pres. Tense	habeō	sum	habeam	sim
Imperf. Tense	habēbam	eram	habērem	essem
Fut. Tense	habēbō	erō		
Perf. Tense	habuī	fuī	habuerim	fuerim
Pluperf. Tense	habueram	fueram	habuissem	fuissem
Fut. Perf. Tense	habuerō	fuerō		

It is of the greatest importance that this order of tenses be firmly fixed in the mind, (1) because forms are most readily recalled when they are arranged in a definite order, and (2) because, in taking up a new conjugation, the fixed place for each tense helps to bring out clearly the points of similarity and difference between the new forms and those of the same tenses of conjugations already learned.

The above synopsis gives the first person singular of each tense. Following the same order of tenses, give a synopsis of **habeō** and **sum** in the second person singular, the third person singular, the first person plural, etc. This exercise should be repeated until a synopsis in any person and number can be given without hesitation or mistake.

"and found the chickens on the bank of a stream."
2. "Marcus went stealthily into the kitchen," said Quintus,
"and took a cup. And so we filled it with sand and gave
it to the sailor's monkey. The monkey broke the cup, and
now the cook is angry." 3. "What did you find under the
cook's table, Quintus?" asked Julia. "I did not find my
ball," replied Quintus; "but I saw there your school bag
and Claudia's pen."

EXERCISE XXXV

THE PRINCIPAL PARTS OF THE VERB

To conjugate a regular verb, it is necessary to know, in
addition to the first person singular of the present indica-
tive, the three following forms: (1) the present infinitive
active, (2) the first person singular of the perfect indicative
active, and (3) the perfect passive participle; *e.g.*, **video,
vidēre, vīdī, vīsus**. These four forms are known as the
Principal Parts of the verb.

REMARK 1. When once the principal parts are known, all the
other forms of a regular verb can easily be found. For example,
the present infinitive **vidēre** shows that **video** is of the second con-
jugation (hence **vidēbam, vidēbō; videam, vidērem**), and from the
perfect indicative **vīdī** we find **vīderam, vīderō; vīderim, vīdissem**.
The perfect passive participle gives the key to certain passive
forms, as will be shown later.

REMARK 2. Many verbs, otherwise regular, lack certain forms and, therefore, show less than four principal parts. So, for example, verbs which because of their meaning are not used in the passive.

Learn the principal parts of the following verbs of the second conjugation:

habeō, habēre, habuī, habitus.
So moneō and terreō.
iaceō, iacēre, iacuī.
So lateō, teneō, and timeō.

compleō, complēre, complēvī, complētus.
doceō, docēre, docuī, doctus.
sedeō, sedēre, sēdī, sessum.
videō, vidēre, vīdī, vīsus.

VOCABULARY

locus, -ī, M. (plural, loca, -ōrum, N.), *place, spot.*

idōneus, -a, -um, *suitable.*
iam, adverb, *now.*

REMARK. The use of iam ("now") is not altogether the same as that of nunc. The latter word refers to the present of the speaker, *e.g.,* Mārcus nunc in cymbā est, *Marcus is now in the boat;* but iam can equally well be used in speaking of an event that is past, as, In silvam iam vēnerāmus, *We had now come into the forest.*

RULE. *To mark a question,* -ne *may be added to the first word of a sentence; e.g.,* Librúmne vīdistī? *Did you see the book?* Estísne in hortō, puellae? *Are you in the garden, girls?*

REMARK 1. Note how the addition of -ne causes the accent of the word to which it is joined to shift to the last syllable. Compare the influence of -cum and -que upon the accent of the words to which they are joined.

REMARK 2. In sentences introduced by cūr, quid, ubi, or any other interrogative word, -ne must not be used.

READING LESSON

I. Translate into English :

A. 1. Meamne capsam vīdistis, puerī? Herī in taber-

ierat, ut corbulam sagittīs complēret.   4. Voluistīne, mī
fīlī, columbārum ōva nīdumque vidēre?

B. A Marauder Punished

Tum puerīs " Ōlim," inquit Iūlia, " lupus malus, cum ē

rum miserōrum, eōrumque equōs occīdit.   Itaque agricolae

in the town, girls?   We wanted to see his basket, but he
was unwilling.

B. 1. "On the bank of a small stream we found an
arrow and a basket," said Marcus.   "Quintus broke the
arrow with a stone, and I threw the basket into the water.
Meanwhile the farmer was filling (his) cup with wine ; and
so he did not see us."   2. "When I went into the garden
yesterday," said Claudia, " I found a suitable place, and

sat for a long time in the shade. Then the boys came
home from school, and began to frighten your raven, Julia.
And so I ran into the yard to warn your grandfather."

REMARK. The above forms can easily be memorized by com-
paring them with the corresponding forms of **habeō**. Thus, in the
imperfect indicative and subjunctive, and in the future indicative,
the formation of the two conjugations is very similar, the only
difference being that **habeō** has ē and **vocō** has ā in the second
syllable of each form. For purposes of comparison, it may be

found convenient here and elsewhere to consult the Summary of Forms, page 204 ff.

NOTE. The perfect indicative **vocāvī** is given above among the principal parts of the verb. With this as a base, give a synopsis of **vocō** in the first person singular of the perfect, pluperfect, and future perfect tenses.

VOCABULARY

dō, dare, dedī, datus, *give* (see Summary of Forms, p. 218).

properō, properāre, properāvī, properātum, *hurry, hasten.*

REMARK. Wherever the principal parts of a verb are given in full, it is customary (as in this Exercise) to state the meaning of the verb in the most general terms, without attempting to translate exactly any one of the principal parts. From the general definition the meaning of any particular form can easily be derived.

READING LESSON

I. Translate into English:

A. 1. Puerōs vocābimus, ut corvum meum videant. 2. Mīsistisne Mārcum dēfessum, cum ē lūdō vēnisset, ut agricolam vocāret? 3. Cūr ad cymbam īstī? ut nautae obēsō librum darēs? 4. Estne Mārcus in agrīs? Quīntus in āreā est; nam nautae fīliō gallīnam dat.

B. *The Fox and the Chickens*

"Herī," inquit Mārcus, "avus meus cum agricolīs validīs in silvam iit, ut spēluncās latebrāsque ursārum vidēret. Ibi cum sedēret in foliīs, vulpēcula fūrtim ē silvā in agrōs vēnit, et celeriter cucurrit in hortum nostrum gallīnāsque multās rapuit. Interim agricolae ursārum spēluncās invēnerant; itaque avum meum vocābant. Sed iam in silvam vēnerat Quīntus, ut avum agricolāsque vocāret, quia vulpēcula gallīnās rapuerat. B. 1. "To-morrow," said Julia, "we will hurry from school and fill our baskets with berries.".   2. "Why are you in the yard, girls?" asked Claudia.   "We are calling the boys," replied the girls.   "But they are in the fields; and so they do not see us."   3. "The farmer gave me a basket," said Marcus, "and went with me to the boat. The sailor's sons could not give us his beautiful shells, but I found many in the sand."

REMARK 1. Nouns of this declension vary widely in the form of the nominative singular, but the genitive always ends in -**is**, as in the above examples.

REMARK 2. Note that here (as in all other declensions) the accusative case of a neuter noun is the same as the nominative, both in the singular and in the plural.

Gender. There is no simple rule for the gender of nouns of the third declension, and it is therefore necessary to learn the gender of each word as it is taken up.

When the above forms have been memorized, test your recollection of them by declining together **flōs pulcher, arbor magna, lītus tūtum,** etc.

VOCABULARY

REMARK 1. As an aid to the memory, note that the endings of the imperfect and future indicative of this verb are identical with those of the corresponding tenses of **vocō** and **habeō**; and compare the present subjunctive of **eō** with that of **habeō**.

REMARK 2. The imperfect subjunctive of any verb, regular or irregular, can be found by adding **m** to the present infinitive active; note above **īre** and **īrem**.

Using as a basis the perfect indicative **iī**, give a synopsis of **eō** in the second person singular of the perfect, pluperfect, and future perfect tenses.

VOCABULARY

NOTE. The conjunction **autem** is a postpositive word; *i.e.*, it does not stand first in its sentence. Usually it is found in second place; *e.g.*, **Mārcus autem ad lītus ierat,** *Marcus, however, had gone to the shore.*

MODEL SENTENCE

THE THIRD DECLENSION

I-Stems

ignis, M., *fire* **vallēs**, F., *valley* **mare**, N., *sea*

	SINGULAR	PLURAL	SINGULAR	PLURAL	SINGULAR	PLURAL
Nom.	ignis	ignēs	vallēs	vallēs	mare	maria
Gen.	ignis	ignium	vallis	vallium	maris	——
Dat.	ignī	ignibus	vallī	vallibus	marī	——
Acc.	ignem	ignīs	vallem	vallīs	mare	maria
		ignēs		vallēs		
Abl.	ignī,	ignibus	valle	vallibus	marī	——
	igne					

NOTE. The following classes of third declension nouns belong to the I-stems:

(1) Masculines and feminines in -is and feminines in -ēs which have the same number of syllables in the nominative and genitive singular (as **ignis, ignis ; vallēs, vallis**).

(2) Neuters in -e, -al, -ar.

REMARK 1. The most important difference between consonant and I-stems is that the latter have -ium (instead of -um) in the genitive plural, and that neuter I-stems have -ia (instead of -a) in the nominative and accusative plural. Note also that -īs is the preferred ending for the accusative plural of masculines and feminines ; and that there is considerable variation in the ending of the ablative singular. The forms of this latter case are best learned by becoming personally acquainted with each noun.

REMARK 2. The blanks in the plural of **mare** mean simply that certain cases of this noun are not in common use. The word is here chosen as a model because it is the most completely inflected neuter I-stem employed in this book. (In the genitive, dative, and ablative plural, fully inflected neuter I-stems show the same endings as masculines and feminines.)

collis, -is (abl. -e), M., *hill.*

piscis, -is (abl. -e), M., *fish.*

vehementer, adverb, *very, much, exceedingly.*

READING LESSON

I.   Translate into English:

A. 1. Meusne pater librum tuum in ignem iēcit? 2. In marī piscīs magnōs vidēre possum. Potesne tū eōs vidēre? 3. In collibus sunt vīllae multae. 4. Per vallem ad rīvum eāmus. 5. Puer piger, cum pater eum in agrōs mīsisset, ad lītus cum frātribus iit, ut sorōris meae cymbam vidēret.

B. A Thief Routed

Iūlia, cum in umbrā sedēret, cēterīs puellīs "Herī," inquit, "Mārcus cum puerīs multīs per collēs in vallem iit; nam in valle rīvus pulcher est. Cum autem ibi iacērent in rīpā, ut piscīs vidērent, lupus magnus ē spēluncā vēnit, eōrumque cēnam fūrtim rapuit. Sed Mārcus id vīderat, et iam īrātus puerōs cēterōs ad lupī spēluncam vocāvit; cumque in eam rāmōs et folia iēcissent lupumque ignī terrērent, is subitō ērūpit ē latebrīs, et in silvam celeriter fūgit. Lupī enim ignīs vehementer timent."

II. Translate into Latin:

A. 1. My mother is afraid of the sea. My brother and sisters, however, are in the boat. 2. And so they will go quickly through the valley; for there are many bears in the woods. 3. Was the farmer able to help the poor sailor? I called my father to help him. But my brothers were then putting a bear into the cage; and so (my) father could not go into the fields.

B. 1. "The sailors now threw the fish into the sea," said Marcus; "for the farmers had refused to fill their baskets with apples." 2. "I began to be much afraid," said Claudia to the boys. "For there was an intoxicated sailor in the yard, and my father had gone into the hills to give money to the farmers." 3. "Let's hurry into the kitchen, Marcus," said Quintus. "Two little foxes have come into the garden, and we will frighten them with fire."

REMARK. Observe that, except in the imperfect indicative, the above forms of the third conjugation are more or less unlike the corresponding forms of the first and second conjugations. Note particularly that in the imperfect subjunctive the first e of the ending is short, and contrast the corresponding ē of the imperfect subjunctive of the second conjugation (as seen in **habērem**, etc.).

The perfect tenses of the following verbs are already familiar. Learn now the principal parts:

cadō, cadere, cecidī, cāsum, *fall.*
currō, currere, cucurrī, cursum, *run.*
dūcō, dūcere, dūxī, ductus, *lead, bring.*

occīdō, occīdere, occīdī, occīsus, *kill.*
vehō, vehere, vēxī, vectus, *carry.*

REMARK. Note that the present infinitive of the third conjugation ends in -ĕre, an ending which must be distinguished carefully from the corresponding -ēre of the second conjugation.

READING LESSON

I. Translate into English:

A. 1. Mārcī frāter columbārum ōva saxīs frangere voluit; sed pater eum in agrōs mīsit, ut equōs dēfessōs ad aquam dūceret. 2. In tabernam tum ībāmus, ut bācās ūvāsque emerēmus.   3. Cum autem per silvam magnam īrent, ursa alba piscēs vīdit, lupōque " Piscēs videō," inquit; " puerōs terreāmus." Itaque lupus subitō ex arborum umbrā ērūpit. Tum corbulae cum piscibus pulchrīs cecidērunt in terram, puerīque per vallem perterritī cucurrērunt. Interim ursa piscīs rapuit, cumque eōs ēdisset, corbulās lupō dedit. Is autem īrātus in spēluncam cucurrit, ibique parvās ursās trēs occīdit.

B. 1. "Let's bring the horses to the shore," said Marcus, "and send them into the sea."   2. "The boys wanted to come with me to the farmhouse, but I refused. And so they ran into the woods and began to climb up into a tall tree to kill a raven. Soon they will be punished."

REMARK. Aside from the principal parts, **ferō** is not specially irregular. In general its inflection follows that of **mittō**; but note the peculiarity of the imperfect subjunctive **ferrem** (compare **ferre**), and observe that in the present indicative several forms have suffered the loss of a short vowel.

NĀVIS

Roman ships of war carried sails, but relied more upon their oars. The larger vessels often had three or four sets of oars, each set placed a little higher than the last, and all worked together. Such a ship could carry several hundreds of people. The ancient artist who designed the figure of a war vessel shown above made no attempt to preserve a proper proportion between the size of the ship and the size of the men upon it.

B. An Adventure in the Woods

" Ōlim," inquit avus noster, " Mārcus cum puerīs duōbus

VOCABULARY

canis, -is, M. and F., *dog*.

mīlia (-ium, N.) passuum, *miles*.

paucī, -ae, -a, *few, a few*.

vēnātor, -ōris, M., *hunter*.

REMARK 1. Contrary to the rule, canis is not an I-stem.

REMARK 2. The words mīlia passuum mean literally "thousands of paces." In this phrase, passuum of course remains everywhere unchanged; but mīlia is declined in the way above indicated.

NOTE. The rule for the expression of Extent of Time and Space was stated in the last Exercise. An example was there given of Extent of Time; the following sentence illustrates Extent of Space: **Duo mīlia passuum puerī vēnerant,** *The boys had come two miles.*

EXERCISE XLVII

IRREGULAR VERBS

mālō, mālle, māluī, *prefer*
nōlō, nōlle, nōluī, *be unwilling, not wish, refuse*

These verbs are compounds of **volō**, and in the main agree with it in conjugation, as the following synopsis will show:

mālō	mālim	nōlō	nōlim
mālēbam	māllem	nōlēbam	nōllem
[mālam]		[nōlam]	
māluī	māluerim	nōluī	nōluerim
mālueram	māluissem	nōlueram	nōluissem
māluerō		nōluerō	

In the present indicative, however, both **mālō** and **nōlō** are quite irregular, the inflection being as follows:

SINGULAR	PLURAL	SINGULAR	PLURAL
mālō	mālumus	nōlō	nōlumus
māvīs	māvultis	nōn vīs	nōn vultis
māvult	mālunt	nōn vult	nōlunt

REMARK. In the synopsis above, the forms **mālam** and **nōlam** are put in square brackets because they are not in common use. Except for the first person singular, however, the future tense of both verbs is normal.

THE IMPERFECT OF CUSTOMARY PAST ACTION

In addition to the use already familiar, the imperfect indicative is often employed to describe a repeated past action; *e.g.,* Ē silvā ursae in agrōs veniēbant, *Bears used to*

Exercitus Iter Facit

The above picture carved on a monument represents a division of the Roman army crossing the Danube on a bridge of boats. The commander in chief (*imperātor*), who leads the column, does not appear in that part of the carving here shown; but two subordinate commanders can be seen, one already come to land, the other still upon the bridge.

REMARK 1. As a preliminary to learning the above forms of the indicative and subjunctive, note (1) that everywhere in the third persons the passive is formed by adding -**ur** to the corresponding active forms ; and (2) that in the first persons r is either added to final **ō** of the corresponding active forms (with shortening of the **ō**), or substituted there for final **m** or **s**.

REMARK 2. Observe the relation which the forms of the present imperative bear to those of the second persons of the present indicative.

VOCABULARY

nox, noctis, F., *night*.   **castra, -ōrum**, N., *camp*.

REMARK. In the plural, **nox** has I-stem endings.

MODEL SENTENCE

Ursae enim ā vēnātōre occīsae erant, For the bears had been killed by the hunter.

RULE. *With a passive verb, the doer is indicated by the ablative case introduced by the preposition* **ā, ab.** *This construction is known as Ablative of the Agent.*

REMARK 1. The ablative of agency must be distinguished carefully from the ablative without a preposition as used to tell the *means* by which a thing is accomplished ; *e.g.*, **Ursae enim secūrī occīsae erant,** *For the bears had been killed with an ax.* Here the doer is not mentioned at all ; but the means by which the act was done is indicated by **secūrī**.

REMARK 2. The two forms of the preposition **ā, ab** are identical in meaning. The form **ab** is to be used when the following ablative begins with a vowel or **h**.

BUILDING A RAMPART

Roman soldiers were trained to work as well as to fight, and on campaigns, even under ordinary circumstances, they had much fortifying to do. For when the army halted in the open country even for a night, a well-ordered camp (*castra*) had to be laid out and surrounded by a wall of fortification. The above illustration represents another carving on the monument referred to in connection with Exercise LIII.

Thus we may say either **Iubeō tē īre**, *I order you to go*, or **Volō tē īre**, *I want you to go*.

REMARK 2. The genitive plural of **lūx** is lacking, and the ending of the accusative plural is **-ēs** or **-īs**.

With the exception of **ūnus**, the above cardinal numerals are indeclinable. The plural of **ūnus** is regular, but the singular is inflected as follows:

There are in Latin eight other adjectives declined in the genitive and dative singular after the fashion of **ūnus**. Although not all of these words are to be here used, the full list should be memorized once for all; namely, **alius, alter; ūllus, nūllus; uter, neuter; sōlus, tōtus, ūnus.** See also Summary of Forms, page 197.

NOTE. When strengthened by the adverb **ūnā**, the preposition **cum** is often well rendered by "together with," "along with," etc. ; *e.g.*, **Nāvēs ūnā cum cymbīs ad īnsulam missae sunt,** *The ships, together with the boats, were sent to the island.*

Is, ea, id AS AN ADJECTIVE

INDIRECT DISCOURSE

What a person says, thinks, hears, or the like, may be reported directly or indirectly. Thus, if Marcus yesterday uttered the sentence, "The dog is lying in the grass," to-day I can report what he said

(1) Directly: *Marcus said, "The dog is lying in the grass;"*

(2) Indirectly: *Marcus said that the dog was lying in the grass.*

By the use of either sentence I tell exactly what Marcus said, but in one case I quote the very words he used, in the other I do not. Quotation by the second method is known as Indirect Discourse. The two English sentences given above would appear in Latin in the following form:

(1) Direct: "Canis in herbā iacet," inquit Mārcus.
(2) Indirect: Mārcus dīxit canem in herbā iacēre.

It will at once be seen that the Latin method of indirect quotation is quite different from the English; for the Latin here somewhat literally would be: "Marcus said *the dog to be lying* in the grass."

RULE FOR INDIRECT DISCOURSE. *The infinitive with subject accusative is used in quoting indirectly anything said, thought, heard, or the like.*

NOTE 1. Indirect quotation of course is not confined to things said, thought, heard, etc., in the past. Whatever *is, was,* or *shall be* said, thought, heard, etc., is treated in one and the same way; *e.g.,*

Vēnātor putat ursam in spēluncā esse, The hunter *thinks* that the bear is in the cave.
Vēnātor putābit ursam in spēluncā esse, The hunter *will think* that the bear is in the cave.
Vēnātor putāvit ursam in spēluncā esse, The hunter *thought* that the bear was in the cave.

At first sight it may seem a little odd that in the last of these examples the present infinitive esse balances "was" in the English translation. The justification of the present infinitive in such a sentence at once appears, however, if we revert again to a literal rendering: "The hunter thought the bear *to be* in the cave."

NOTE 2. In addition to its subject accusative, the infinitive of indirect discourse may, of course, have also an accusative object;

e.g., **Mārcus dīcit vēnātōrem occīdere ursam,** *Marcus says that the hunter is killing the bear.*

NOTE 3. The reflexive **sē** (**sēsē**) is used as subject or direct object of the infinitive of indirect discourse when the verb of saying, thinking, etc., is in the third person, and the accusative refers to the subject of that verb; *e.g.*, **Mārcus dīxit sē in herbā iacēre** (Marcus said himself to be lying in the grass), *Marcus said that he was lying in the grass.*

Much frightened by these things, the children now learned that the same Indians were killing the horses. 4. The farmers seized a boat, so that (their) wives and children might be sent at once to a safe and suitable place. 5. "Do you see a light in the sky, my son?" asked the farmer. "I think I see a great star," replied the boy; "but clouds are filling the whole sky."

THE RELATIVE PRONOUN

In Latin an entirely new sentence may be begun by a relative pronoun referring back to something mentioned in the previous sentence. The relative so used is best translated by a demonstrative pronoun; *e.g.*, **Indī in silvam properāvērunt. Quod cum vīdissent, agricolae laetī ē latebrīs vēnērunt,** *The Indians hurried into the forest. When the farmers saw* **this,** *they came joyfully from their hiding places.*

REMARK. Note that in this use, as regularly elsewhere, the relative stands first in its clause.

VOCABULARY

ovis, -is (abl. -e), F., *sheep.*

vōx, vōcis, F., *voice, cry.*

custōdiō, custōdīre, custōdīvī, custōdītus, *watch, guard.*

redeō, redīre, rediī, reditum, *return, go back.*

nūllus, -a, -um, *none, no, not . . . any.*

ūllus, -a, -um, *any.* Used, mostly in negative clauses.

fortasse, adverb, *perhaps.*

paulō post, adverbial phrase, *a little later.*

REMARK. The declension of nūllus and ūllus is the same as that of ūnus; see Exercise LIX.

READING LESSON

I. Translate into English:

A. 1. Magnā vōce puerōs vocēmus, ut corbulae statim ab eīs ad castra ferrī possint. 2. Quod cum cōgnōvissent, mīlitēs celeriter rediērunt, ut imperātōris uxōrem līberōsque custōdīrent. 3. B. A Practical Joke

Agricolae quīdam, quī ovēs habēbant multās, puerum pigrum in agrōs īre iubēbant, ut eās custōdīret. Cui "Lupus fortasse ē silvā veniet," inquiunt. "Tum nōs vocā; nam ex hortīs statim currēmus, ut terreāmus lupum tēque adiuvēmus." Diū puer custōdīvit ovīs, neque ūllum lupum vīdit. Sed ōlim, ut agricolās terrēret, subitō magnā vōce "Lupōs, lupōs!" inquit. Quā vōce commōtī, agricolae celeriter in agrōs cucurrērunt. Cum autem lupum vīdissent nūllum, puerumque lūdere cōgnōvissent, vehementer īrātī in hor-

tōs rediērunt. Sed paulō post vēnit ē silvā lupus magnus. Tum puer perterritus magnā vōce "Lupum, lupum!" inquit; "celeriter currite, agricolae!" Eī autem putābant puerum lūdere, nec in agrōs properāre voluērunt. Is igitur miser ā lupō occīsus est.

II. Translate into Latin:

A. 1. A little later, perhaps, a few fish will be carried to town by the sailors; but I do not think that there are any sailors in the ship now. 2. Whose voice was heard in the fields? 4. Why did you return home from the shore? Did you think that the Indians were burning your grain?

B. 1. "While I was myself watching the same sheep," said the farmer, "a strong wolf came from (its) cave. For the night was dark, and there were many clouds in the sky." 2. "In the morning," said Julia, "we shall hear the voices of birds in the trees." "I do not see any nests," said Marcella. "Do you think that there are birds there, Quintus?" 3. "We withstood the attack bravely for a long time," said the soldier; "for we thought that our general was hurrying from the shore with all the sailors." 3. 	SINGULAR	PLURAL
2d person	fī	fīte

REMARK. The forms **fīmus** and **fītis** are put in square brackets because they are not in common use.

NOTE I. **Fīō** (" be made," " become "), despite its largely active formation, is logically the passive of **faciō** (" make "). It thus happens that **faciō** utilizes the above forms of **fīō**, instead of working out its own corresponding regular passive forms; *e.g.,* **Cum pāx fieret,** *When peace was being made.* In the perfect tenses, **fīō** in turn utilizes the passive forms of **faciō** (as, **factus sum**, etc.).

NOTE 2. Just as with the verb **sum** (see Exercise XIV), a predicate noun or adjective is often found with **fīō**; *e.g.,* **Mārcus fit rēx puerōrum,** *Marcus is made king of the boys.*

THE PERFECT PASSIVE PARTICIPLE

This fourth principal part of the verb is already familiar from its use in the formation of the perfect, pluperfect, and future perfect tenses of the passive. It can of course be used also apart from these formations; *e.g.,* **vocātus, -a, -um** (*having been*) *called;* **habitus, -a, -um** (*having been*) *had;* etc.
EQUITĒS

This illustration shows another carving on the monument re-
ferred to in connection with Exercise LIII.

MODEL SENTENCE

Nāvibus ignī cōnsūmptīs, exercitus noster statim ad silvam iter fēcit, When the ships had been burned (*lit.* the ships having been burned), our army marched at once to the forest.

RULE. *A noun in the ablative case, with a participle in agreement, may be used to tell the circumstances under which something happens. This construction is known as the Ablative Absolute.*

REMARK. The ablative absolute of the model sentence simply provides another way of saying **Cum nāvēs ignī cōnsūmptae essent,** and in the English translation it is best rendered (as above) by a clause introduced by "when." All ablative absolutes are better translated in some such way as this ; but until the new construction has become somewhat familiar, it may be found helpful to use the literal rendering also.

would flee quickly into the forest.

B. 1. "The sailor's son was sad," said Marcus, "be-
cause he wanted to marry the general's daughter, and had
learned that her father was unwilling."   2. "We were
sending back the same boy to catch the little wolf," said
the farmer. "But suddenly there came from the forest a

hunter on horseback who had caught the little wolf with (his) hands and killed its mother with arrows."   3. When the water had been carried into the ship, the sailors themselves bought grain, and at once prepared to cross the river; for they feared the violence of the Indians, who often come to this place at night to capture the children of the farmers and steal their horses and sheep.

EXERCISE LXV

THE COMPARISON OF ADJECTIVES

In Latin, as in English, there are three degrees of comparison, namely Positive, Comparative, and Superlative; *e.g.*,

altus, altior, altissimus, *tall, taller, tallest* (*very tall*).
fortis, fortior, fortissimus, *brave, braver, bravest* (*very brave*).

Adjectives in -**er** form the superlative by adding -**rimus** to the positive.   And in the formation of the comparative they retain or drop the **e** according as it is retained or dropped in the declension of the positive; *e.g.*,

miser, miserior, miserrimus.
piger, pigrior, pigerrimus; so **ācer, āter,** and **pulcher.**

The comparatives and superlatives of some adjectives are very irregular:

bonus, melior, optimus.	**multī, plūrēs, plūrimī.**
magnus, maior, maximus.	**parvus, minor, minimus.**
malus, peior, pessimus.	

Superlatives are declined in the same way as **bonus**. The declension of the comparative is as follows:

altior, -ior, -ius, *taller*

apud, preposition, used with the accusative case, *among, at the house of.*

libenter, adverb, *gladly, readily.*

facile, adverb, *easily, without difficulty.*

haud procul, adverbial phrase, *not far away.*

THE COMPARISON OF ADVERBS

Adverbs, like adjectives, have three degrees of comparison ; *e.g.*,

longē, longius, longissimē, *far, farther, farthest* (*very far*).

fortiter, fortius, fortissimē, *bravely, more bravely, most bravely* (*very bravely*).

Learn also the comparison of the following adverbs :

ācriter, ācrius, ācerrimē.

celeriter, celerius, celerrimē.

diū, diūtius, diūtissimē.

facile, facilius, facillimē.

libenter, libentius, libentissimē.

REMARK 1. Note that the adverbs ācriter and celeriter are derived from adjectives in -er (namely ācer, celer), and that they form the superlative accordingly (see Exercise LXV).

REMARK 2. Observe that the comparative of an adverb is regularly the same as the neuter singular of the comparative of the corresponding adjective ; *e.g.*, ācrius, fortius, etc.

[1] When a possessive adjective precedes the noun it modifies, the word "own"
often needs to be added in the English translation; *e.g.*, "my (own)," "our

B. 1. " Did the general say that he was afraid of the Indians?" asked the hunter. "He said that he was not afraid himself," answered Marcus, "but that no army could withstand the attack of all the tribes." 2. B. A Wife Regained

Ōlim Indī, quī prope castellum parvum habitābant, colōnōs parābant occīdere. Itaque agricolae multī, cum id cōgnōvissent, cum uxōribus līberīsque ad urbem quandam, statim properāvērunt. Cēterī autem, quī fortiōrēs erant, ē vīllīs fugere diū nōlēbant; sed postrēmō, cum iam undique Indī occīderent colōnōs vīllāsque ignī cōnsūmerent, maestī ad eandem urbem iter facere coepērunt omnēs. Quō in itinere mulier quaedam, cuius vir gladium āmīserat, ab Indīs capta est. Quam cum ad rēgem dūxissent, hostēs celerrimē in agrōs rediērunt, ut ovīs quoque et equōs raperent. Interim agricola, uxōre captā, colōnōs ex urbe noctū vocāvit; quī cum Indīs ācerrimē pugnāvērunt rēgemque

EXERCISE LXIX

DEPONENT VERBS

In all conjugations there are verbs, otherwise regular,
which (aside from participles, etc.) are conjugated only in
the passive, and yet have active meaning throughout.
Such verbs are known as Deponents; see Summary of
Forms, page 212. The following Vocabulary includes
deponents representative of all conjugations.

VOCABULARY

moror, morārī, morātus sum,
delay, tarry, linger.

**polliceor, pollicērī, pollicitus
sum,** *promise.*

**proficīscor, proficīscī, profec-
tus sum,** *set out, start.*

patior, patī, passus sum, *al-
low, suffer.* Often con-
strued with the accusative
and present infinitive.

adorior, adorīrī, adortus sum,
attack.

REMARK. The principal parts of a deponent verb are three instead of four because the perfect indicative of such a verb involves in its own formation the perfect passive participle, which therefore need not be given separately.

Abl.	aliquibus	aliquibus	aliquibus

NOTE. The above pronoun is here treated as an adjective. It may also be used as a noun, meaning "some one, something," "any one, anything," etc. When so used, **aliquis** replaces **aliquī** (nominative singular), and **aliquid** replaces **aliquod** (nominative and accusative singular), and the feminine is lacking throughout.

REMARK. Distinguish between the use of the adjectives **aliquī** and **ūllus** (Exercise LXII). Both words may mean "any," but **ūllus** is used mostly in negative clauses.

VOCABULARY

iste, ista, istud, *this, that.*
numquam, adverb, *never.*

sequor, sequī, secūtus sum, *follow.*

NOTE. The declension of iste is the same as that of ille (Exercise LXX).

REMARK. The conjunction aut is sometimes repeated in the form aut . . . aut. The meaning then is "either . . . or."

READING LESSON

I. Translate into English:

A. 1. Vidētisne aliquid in silvā? Nōs aut ursam aut lupum in agrō vidēmus. 2. Istōs Indōs nōn timēbam. Eī enim colōnōs numquam occīdere cōnātī erant. 3. APPENDIX I

THE PRONUNCIATION OF LATIN

Alphabet. The Latin alphabet is like the English, excepting that it lacks the letters **j** and **w**; moreover, **k, y,** and **z** are little used in Latin.

Sounds. Latin speech sounds are of two general classes; namely, Consonant and Vowel.

NOTE. The letter **i** has two uses: sometimes it is to be read as a consonant, sometimes as a vowel. It is to be read as a consonant (*a*) when it stands between vowels within a word, as in eius ; and (*b*) when it begins a word and is followed by a vowel, as in **iam.**

Consonants. The consonant sounds of Latin are expressed by **b, c, d, f, g, h, i, k, l, m, n, p, q, r, s, t, v, x,** and **z.** Nearly all of these letters are sounded as in English, but the pronunciation of the following requires special notice:

b, when followed by *s,* or *t,* is sounded as *p*; as in *urbs* and *obtineō.*

c as in *cut* (never as in *cent*).

g as in *get* (never as in *gem*).

i as *y* in *yet.*

s as in *sat* (never as in *busy* or *sure*).

t as in *tin* (never as in *rational*).

v as *w* in *wind.*

REMARK. The letter **q** is found only in the combination **qu.** Here (and sometimes in the combinations **gu** and **su**) the letter **u** represents **v,** and must be so pronounced.

Vowels.   The vowel sounds of Latin are represented by
a, e, i, o, u, and **y.**

NOTE 1.   Vowels may be either long or short.   A long vowel
is indicated by writing a straight line above the letter, as ā.   A
short vowel is usually unmarked ; but the sign ˘ is sometimes used,
as ă.

NOTE 2.   By running two different vowels together into a
single sound, a diphthong is produced.   The principal diphthongs
of Latin are **ae, au,** and **eu.**

The Latin vowel and diphthong sounds are as follows :

ā as *a* in *farther.*	ŏ as *o* in *forty.*
ă as *a* in *ahém.*	ū as *u* in *rude.*
ē as *e* in *they.*	ŭ as *u* in *put.*
ĕ as *e* in *let.*	**y** as German *ü.*
ī as *i* in *machine.*	**ae** as *y* in *try.*
ĭ as *i* in *bit.*	**au** as *ou* in *out.*
ō as *o* in *tone.*	**eu** as *eu* in *feud.*[1]

Syllables.   A Latin word has as many syllables as it
has vowels or diphthongs.

In dividing a word into syllables, (*a*) a single consonant
goes with the following vowel, as **e-go**; (*b*) a group of
consonants is usually shared between two syllables, as
duc-tus and **sel-la.**   But to this last there are many excep-
tions, whole consonant groups sometimes being pronounced
with the following vowel.[2]

Length of Syllables.   Syllables may be either long or
short.

----

[1] The diphthong *eu* is not often found.   Two other infrequent combinations are
oe and *ui,* as seen in *coepī* and *huic.*   These latter diphthongs have the sound of
Latin ŏ + ĕ and Latin ŭ + ĭ, pronounced rapidly and with stress on the second
vowel.

[2] As a rule for printed texts, it is customary in dividing words to put with the
following vowel all the consonants that can be pronounced with that vowel, as
ca-stra and *pu-gna.*

Long are (*a*) those which contain a long vowel or a diphthong; as **tē**, and the first syllable of **sae-pe** or **au-tem**: (*b*) those in which a short vowel is followed in the same word by two or more consonants, or by either **x** or **z**;[1] as the first syllable of **těn-dō**,[2] and **nŏx**.   But, by exception, a syllable in which a short vowel is followed in the same word by a mute (**c, g, t, d, f, p,** or **b**) and a liquid (**l** or **r**) is usually short.[3]

Short are the syllables which contain a short vowel not followed in the same word by two or more consonants; as the two syllables of **ro-sa**.

REMARK.   Distinguish carefully between long *vowel* and long *syllable,* noting (as shown above) that the vowel of a long syllable may be itself short.

Accent. Latin words of two syllables are accented upon the first syllable; as, **ménsa.** Words of greater length are accented upon the last syllable but one, if that be long, otherwise upon the preceding syllable; as, **colónus, magíster,** and **pátěra.**

REMARK.   The addition of -**cum**, -**ne**, or -**que** causes the accent of the words to which they are joined to shift to the last syllable; as, **nōbíscum, vidésne,** and **puelláque.**

---

[1] Both *x* and *z* stand for double consonant sounds, *x* being equivalent to *c* + *s*, and *z* probably representing the sound of *d* + *s*.

[2] Note that the first syllable of *ten-dō* contains only one of the consonants whose presence makes it long.   According to current metrical theory, any syllable that ends in a consonant is thereby closed and made long.   On this basis, *těn-* is in and for itself a long syllable.   The influence of the following *d* lies simply in the fact that its presence makes it necessary to pronounce the *n* with the preceding vowel (for *te-ndō* would be unpronounceable), thus closing the preceding syllable and making it long.   Contrast the situation in *tě-neō,* where the first syllable is open and short, there being no following consonant to force the *n* back into that first syllable.

[3] Because the mute and liquid (e.g., *tr, pl,* etc.) can both so readily be pronounced with the following vowel, thus leaving the preceding syllable open and short.
